

# autostone

## floor systems

### Chevrolet "Acceptable Alternate". AutoStone specification sheet. 2015 ver 01.15

AutoStone is an acceptable alternate. Sample submittal or request for alternate use is not required with AutoStone. Just include AutoStone on your CD review documents and include specification information for use.

Look to the AutoStone "bright finish" option. This finish provides a better surface that reduces surface staining. The AutoStone "bright finish" is also easier to clean and maintain over natural/matte or polished tile surfaces! The best choice for your dealership facility.

#### Showroom Areas

Series: Granite

AutoStone Floor Systems for your Showroom
