

drive series! and Enviroshop. AutoStone Grout Specification Sheet 2015_{v 07}

AutoStone Floor Systems comes with the appropriate grout for your service drive and/or shop floor installation. We recommend the following grout system to be the best product for this industrial setting. AutoStone in partnership with Laticrete

Service Drives and Shop Floors:

AutoStone recommends a pre-sealed (premium) grout for your service drive.

The AutoStone program offers you (2) levels of grout protection. Both solutions are from Laticrete. Our baseline grout is PermaColor, which we suggest for your shop floor areas. This is an excellent sanded grout for your dealership and for certain areas in your dealership.

For a higher performance grout (**which includes an upcharge**), we recommend Laticrete PermaColor **SELECT**®. This is a breakthrough in grout technology.

It maximizes performance while providing ease of use. Its unique formulation is highly stain resistant and provides strong, color consistent joints by resisting efflorescence, fading, cracking and grout shrinking.

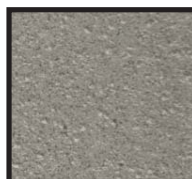

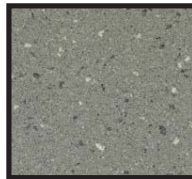

Laticrete PermaColor **SELECT**® provides excellent performance in virtually any environment, including high traffic and wet conditions, and in residential and commercial applications. PermaColor **SELECT** is a pre-sealed grout.

Specification Submittal: Please use this as your reference sheet for grout specifications and our submittal for your project. If you have any questions, please contact us at:
