All materials are built and manufactured to build better Audi dealerships!

## AoA Architectural Terminal Program. AutoStone Tile Program Advantage - "how AutoStone is a better Audi material" 2019 v 06

**Advantage (2): AutoStone manufactured Audi tile is same thickness, while other tile is not!**

### The AutoStone Advantage:

Other tiles have varied dimensional thicknesses. AutoStone tile is a consistent platform.

 TCL supplied F-1 is 8 mm thick (20% less tile than AutoStone F-1).

 TCL supplied F-3 is 9 mm thick. (10% less tile than AutoStone F-3).

AutoStone recommends thicker large format tile to support vehicle weight.

Materials of varied thickness may require additional labor and floating materials cost.

### The AutoStone Advantage:

AutoStone tiles F-1(d) and F-3(a) are 10 mm thickness, and deliver a thicker large format tile to abut together in the showroom and customer areas .

\*the manufacturing tolerance is + or - .5 mm - exacting precision!

**F-1D - Showroom Floor Tile**
