

**Project Registration and Materials Use Confirmation Agreement**

AutoStone is a Tile Contractor's best partner on your Mercedes-Benz USA Autohaus3 project. We know that you need a reliable supplier who has the materials you need, when your contract requires them to be installed. This program helps reduce both pricing and product availability risk!

When you partner with AutoStone, you win big because you purchase smart! We know there is a time gap between when you receive word that you are going to be awarded your project contract and when you actually receive (and complete) your contract. This time gap presents risk because the tile materials you quoted and are contracting to supply may not be available when required. The "just in time" material supply model is broken, and tile contractors can be at risk as you remain contractually obligated to supply this required materials. With this executed agreement, AutoStone will guarantee the timely delivery of your tile materials and assurance that your material pricing remains fixed (as reflected in your quote). See details on how AutoStone will hold your materials in storage at no-charge and how AutoStone will suspend your deposit payment until your contract has been executed to reduce your financial exposure.

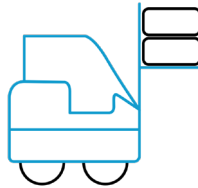

**Guaranteed Fixed Price with AutoStone Tile**

When you sign your AutoStone Materials Quote and request your Fixed Price & On-Time Inventory Agreement, you will receive this document back with our signed acceptance. This agreement confirms that all AutoStone pricing on your quote will be fixed for a period of up to 12-months.

With this agreement, AutoStone will suspend your initial material deposit payment requirement until after you get your contracting completed and prior to materials being shipped.

We reduce your risk by securing materials without you making a financial expenditure!

**Guaranteed On-Time Materials with AutoStone**

With the Tile Contractor Fixed Price & On-Time Inventory Agreement your materials are guaranteed to be available to ship, when you need them! Your agreement much include all items, quantities, and the delivery date.

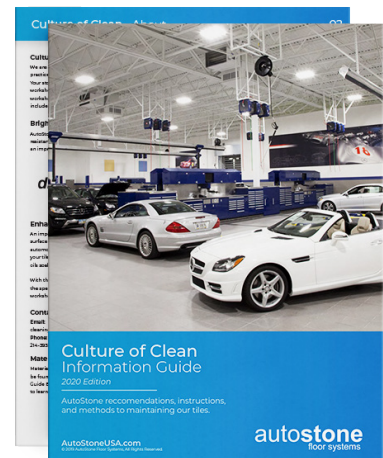

With your signed commitment your materials will be available to ship on-time to meet your requested date.

Additionally, should your project run later than the projected delivery date, AutoStone will continue to hold your materials at no charge for the balance of the one-year period.

We reduce the risk of not having the materials you need, when you need them!
