Edge: Rectified

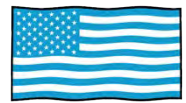

MADE IN USA

DCOF	ASTM Test: A326.3-2017
	ANSI Benchmark: $\leq .42$
	ASTM Results: $\leq .42$

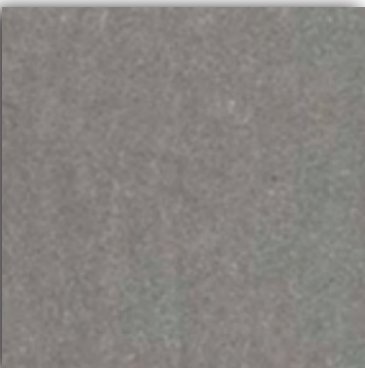

Product Note & Why AutoStoneUSA is best for your Volvo project:

AutoStoneUSA large format showroom tile is 8 mm thick and can installed using standard A137.1 tile installation practices. This is an alternative tile which is 6 mm and is a THIN GAUGE tile. Thin gauge tiles have a different installation process which includes different setting materials, process, labor qualifications, and other requirements related to installing this thinner material.

AutoStoneUSA tile is Made in USA, in-stock, and when made has a CARBON NEUTRAL rating. The other tile is imported and has a large carbon footprint related to trans-ocean shipping, port transportation and is prone to supply chain risk.

Thin Gauge tile requires higher percentage of materials to be purchased due to the fragile nature of this thinner material. Imported materials increase your project risk if you require more materials after the project has started. AutoStoneUSA materials are not as fragile and if you need additional materials it is in-stock in the USA.

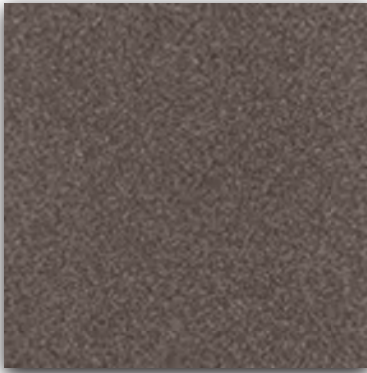

When you drive vehicles on a large format showroom tile having a thicker material delivers better long-term results.

T-2 Restroom Wall Tile - Option (1)

Series: Ceramiche 109
Color: Deep Grey
Finish: Honed | Natural
Size: 12" x 24" x 9 mm
Edge: Rectified

DCOF	ASTM Test: A326.3-2017
	ANSI Benchmark: $\leq .42$
	ASTM Results: $\leq .42$
