Color: American Harvest.2
Finish: Natural | Honed
Size: 03" x 24" (U.S. Nominal Dimensions)

LargeFormat

Why go small?
Go Large Format.
Less grout = less grime.

WHY MADE IN THE USA IS THE BEST CHOICE FOR YOUR HYUNDAI PROJECT

Available Now! Large format 24" x 48" tile in the same color, shading, design and at SAME PRICE as the current GDSI2.0 approved CT-1 tile 12" x 24" size.

Both sizes have AutoStoneUSA Clean.Tech technology, the permanent sealant that aids dealers with cleaning efforts and creates better and cleaner retailing environments.

AUTOSTONEUSA QC TOOL AND SUPPORT DELIVERYS BETTER INSTALLATION RESULTS

AutoStoneUSA includes QC testing the installed floor for tiles not fully bonded to the substrate. AutoStoneUSA recommends full 100% thinset coverage to eliminate future warranty concerns which result in cracked-and-broken tiles. This QC process allows for the quick and thorough identification and then immediate replacement of any tile not fully bonded to the concrete substrate.

You can't see if tiles are fully bonded, but you can hear when they are not.

Chain-Rake Testing & Quality Control Check

AutoStoneUSA supplies chain-rakes on every workshop project because this is the best tool to test your floor for full thinset coverage. You can't see if tiles are fully bonded, but you can hear if they are not.

The AutoStoneUSA chain-rake allows you to test 10,000 sqft in roughly 20 minutes, while the flooring contractor is on-site so tiles not fully bonded to the substrate can be identified by you and fixed by the flooring contractor. **The end is a fully bonded floor delivered to the dealership.** This removes the risk of latent warranty issues that are the source of concern for many operators.
