NEW SIZING (2024): 12" x 12" (*U.S. Nominal Dimension) = 11 ^{5/8"} x 11 ^{5/8"}. Actual Size: **295 mm x 295 mm**. This is a rectified tile.

Sizing

Enviroshop is a rectified tile which means that every tile is precisely cut for exact size dimension. This allows for tighter grout joints due to tile size consistency. Even with rectification precision, tiles dimensions may vary within **(+) or (-) 1 mm** in sizing. This is within ANSI A137.1 and TCNA (Tile Council of North America) standards compliance. 1 mm = 0.03937" or approximately 1/16" or 3/64" in fractional sizing.

Surface

Enviroshop is medium traction surface. For interior wet applications, with good drainage. Can be used for floors walked on when wet if level, clean, maintained and free of standing water or other contaminants. Should be cleaned with frequent maintenance to keep clean and free of contamination and debris when dealership is operating. To best manage STF (slip, trip, and fall) risk, spills and chemicals should be spot cleaned immediately and not left on surface. Floor cleaning should include use of de-greasing chemical, floor scrubber sweeper machine with wet vacuum to suck-up dirty water and debris as part of cleaning process. Service drive environments should have a high-speed vehicle access door to control exposure to exterior environment.

Description

A permanent enhanced porcelain technology floor tile and system for use in automotive workshop and climate controlled service drive environments. For interior environments only.

Advantages

1. Our original workshop floor with textured surface.
2. Surface texture is elevated above the surface bed for easier cleaning.
3. Will not permanently stain or darken when properly cleaned.
4. This product has:

slipresistant
textured floor surfaces

Description

A permanent enhanced porcelain technology floor system. Elevated traction provides a better surface to manage STF (slip, trip, and fall) risk in your automotive service drive, workshop and tech locker room shower areas. See declared uses below. Should be cleaned with frequent maintenance to keep clean and free of contamination and debris when dealership is operating. Spot spills should be removed immediately and not left on surface. Floor cleaning should include use of de-greasing chemical, floor scrubber sweeper machine with wet vacuum to suck-up dirty water and debris as part of cleaning process.

Advantages

1. Advanced surface technology to better manage STF (slip, trip & fall) risk.
2. Surface has repeating lines elevated above the bed of the tile. Designed for greater foot, shoe-sole traction.
3. Will not permanently stain or darken when properly cleaned.

Manufactured Declared Uses

Evaluate for use in automotive workshop and service drive environments.

4.1.4 (Exterior, Wet) - level outdoor spaces walkways, sidewalks, where such floors may be walked upon when wet (excluding ice or snow) if level, clean, maintained and free of standing water or other contaminants.

4.1.5 (Oils/Greases) - level areas regularly exposed to automotive fluids, etc., so long as such floors are level, regularly cleaned, maintained and free of standing water and contaminant build-up. Consult with your architect to determine dealership practices. **Review ANSI A326.3 2021 standard.**
